

INTERSTATE TIRES

4x4 / SUV WINTER TIRES

Arctic Claw TXI

Arctic Claw XSI

- **Tri-Ploymer Bled Tread Compound**

- Specially formulated with Silica for excellent winter traction while maintaining wet and dry performance and treadwear

- **Patented “Snow Grove” Design Technology**

- Provides biting edges for excellent snow and ice traction without reducing element stiffness. The snow grove enhances the retention of snow in the outer circumferential grooves to capitalize on the higher traction characteristics of “snow on snow” versus “snow on rubber”.

- **Enhanced Stud Technology**

- Provides an optimal combination of design, quantity and placement of stud pin holes to maximize the tire’s traction on ice when studded. Stud pin holes are located along 13 distinct paths around the tread to allow each row a clean bite at the road surface to maximize traction.
